                                 :direction :output
                                :if-exists :supersede)
               (funcall thunk))
             (uiop:run-program (concatenate 'string "dot -Tpng -0 " fname)))
       Defines:
          dot→png, used in chunk 3c.
       Creating a Picture of Our Graph
3c
        \langle * 1a \rangle + \equiv
          (defun graph→png (fname nodes edges)
            (dot→png fname
                        (lambda ()
                           (graph→dot nodes edges))))
       Defines:
          graph→png, never used.
       Uses dot→png 3b and graph→dot 3a.
```

Tests

```
⟨test/graphviz.lisp 4⟩≡
  (in-package :lol.graphviz)

(plan 1)

(subtest "Converting Node Identifiers"
  (is (dot-name 'living-room)
        "LIVING_ROOM")
  (is (dot-name 'foo!)
        "FOO_")
  (is (dot-name '24)
        "24"))

(finalize)

Root chunk (not used in this document).
Uses dot-name 1e and lol.graphviz 1a.
```

Glossary

```
object any Lisp datum. 5

prin1-to-string acts like write-to-string with :escape t, that is, escape characters are written where appropriate. 1, 5

write-to-string prin1-to-string and princ-to-string effectively print an object as if by write, prin1, or princ, respectively, and the characters that would be output are made into a string. 5
```
